Summary

I am a Front-End Developer with over 3 years of experience creating and designing amazing websites for various clients and businesses. I want to create beautiful, user-friendly, high-performance websites that bring value and satisfaction to end users.

• Created and designed a web-based product management platform for Rich Fame International Limited using React and PHP to improve product team efficiency and productivity.

• Upgrade to Angular 11 for popular clients such as Flexsystem, Agricultural Bank of China and HKEAA, improving the performance and performance of existing web applications.

• Developed and maintained responsive web applications using Angular, C# and ISAM for various websites of the company's major clients to increase user engagement and retention. I am an avid learner, always trying to keep up with the latest trends and best practices in web development. I would love to connect with you and discuss how I can add value to your business.
